

BreachPlan Connect®

Breach Response Plan Ready-Made for Any Organization

Breach Plan Connect®, powered by NetDiligence®, is a turnkey incident response plan (IRP) solution designed to help senior managers oversee and coordinate their organization's response to a cyber incident.

An actionable incident response plan is a must-have for management teams to:

- Prevent organizational chaos when a breach occurs
- Establish and document clear action steps, roles, and responsibilities in the event of a breach
- Help minimize the cost of data breach recovery
- Help limit the severity of business interruption
- Meet regulatory duties and reduce litigation and regulatory exposures

Breach Plan Connect (BPC) makes developing your organization's incident response plan quick and painless.

In just minutes, you will have pre-loaded (yet customizable) IRP based on best practices, making it easy for senior managers and legal counsel to monitor overall response and provide guidance and authorization to tactical teams, such as IT and related third-party experts, in the event of a breach.

In addition to the plan, the software includes response playbooks for the most common types of incidents, such as ransomware, business email compromise, data exposure, etc.

And critically important, you'll be able to access your plan and playbooks—online and by mobile app—from anywhere.

Prevent organizational chaos and costly mistakes in the event of a data breach event with Breach Plan Connect.

Use discount code 401620-V to lock in your 30% discount on BPC as a valued Trend Micro client. Furthermore, as your trusted incident response vendor, Trend Micro can be listed in your incident response plan so we can directly assist you in the event of a cyber attack.
