RISK TO RESILIENCE
— WORLD TOUR —

AGENDA

WHEN	TOPIC	SPEAKER	SESSION OVERVIEW
13:00			**Registration and welcome coffee**
14:00	**Welcome address**	*Ross Baker, Vice President, Trend Micro UK*	
14:10	**Mitigating business risks associated with human vulnerabilities**	*Jenny Radcliffe, The People Hacker*	Against the backdrop of an ever-increasing attack surface, we need to be able to adapt to increased business risk and strengthen our resilience. Employees remain one of the weakest links in cybersecurity within modern workplaces. Despite remote workers' increased awareness of cybersecurity policies (72%), many still violate the rules due to limited understanding or resource constraints. Meanwhile, criminals get increasingly sophisticated in their employee targeting. Join 'People Hacker' Jenny Radcliffe as she explores the expanding risk of social engineering on businesses. Gain insights into the psychology behind the latest trends and discover strategies for identifying and mitigating hidden risks in your organisation.
14:50	**Cyber risk is a business risk - Navigating uncertainties and mindset shifts**	*Bharat Mistry, Technical Director, UK & Ireland*	Embark on a journey to explore the ever-changing threat landscape, the challenges faced by customers, and the evolving security practices that address these concerns. We will delve into the essential mindset shifts required to develop an effective security strategy in the face of uncertainty.
15:10	**Reimagining cybersecurity through a risk-shaped lens**	*Simon Walsh, Cybersecurity Architect, Trend Micro*	Cybersecurity risk doesn't have to be something you react to only when incidents and breaches occur. See how Trend Micro's Vision One platform facilitates you taking charge of your cybersecurity risk, and allows you to proactively discover, prioritise, and remediate risk before your business is impacted.
15:30			**Tea and coffee break**

RISK TO RESILIENCE — WORLD TOUR —

WHEN	TOPIC	SPEAKER	SESSION OVERVIEW
15:50	**Accelerating SOC: Defending your business with speed and precision**	*Lewis Duke, SecOps Risk & Threat Intelligence Lead, Trend Micro*	Explore best practices for how XDR can help teams to detect, investigate and respond to advanced threats with speed and efficiency.
16:10	**Customer Talks**	*Angus Macrae, Head of Cyber Security, King's College London* *Derek Panton, Director of Cybersecurity Architecture and Engineering, Unilever* *David Jones, Senior Cyber Security Operations Manager, Pets at Home*	Join Kate Emery-James, Sales Director at Trend Micro, as she leads a panel discussion that brings together a very diverse group of industry experts. This engaging and informative session promises to offer a multifaceted view of cybersecurity, drawing from the varied viewpoints and experiences of the participants. Attendees can expect the panelists to share their insights, strategies, and practical approaches to tackling the evolving threat landscape.
16:55	**Tea and coffee break**		
17:15	**Resilience in an evolving threat landscape**	*Bharat Mistry, Technical Director, UK & Ireland*	Threat actors today exploit a rapidly growing attack surface that is constantly increasing in complexity. Despite the challenge of navigating this complexity for all of us, we also know that cybercriminals and hostile nation-states continually find new ways to reach their targets, steal information, extort money, and disrupt business. Attacks are inevitable; we must adapt to increased risks. This talk will map the current threat landscape and prescribe a solution mentality for the risks in our connected world.
17:45	**Drinks reception and dinner at the Hilton Sky Lounge**
