

Trend Micro Cloud One™

A Complete Security Platform Built to Protect AWS Customers

Trend Micro Cloud One™ is an automated, flexible, all-in-one security services platform built on AWS and providing security across a broad volume of services. It helps customers achieve their cloud security objectives, optimizing their migration, cloud-native application development, and cloud operational excellence and compliance.

TREND MICRO CLOUD ONE PLATFORM BENEFITS

Helps customers scale on AWS

Flexible AWS Marketplace subscriptions with annual and pay-as-you-go options, with Free Trials and Free Tiers

Tool and vendor consolidation

Unified, centralized platform

Cloud account enrollment, support, and documentation

AUTOMATED SECURITY ON AWS

I need to...	TREND MICRO	Services	Key Features
Protect our fleet of instances	<u>Trend Micro Cloud One™ Workload Security</u>	Amazon EC2 Amazon ECS AWS Graviton2 Amazon WorkSpaces	<ul style="list-style-type: none"> Advanced antimalware and ransomware protection Intrusion prevention (Hosted IDS/IPS) Log inspection Application control Integrity monitoring Firewall Detection & Response - XDR and Managed XDR API-first development
Monitor our cloud accounts	<u>Trend Micro Cloud One™ Conformity</u>	600+ AWS Rules for 80+ AWS Services AWS CloudFormation	<ul style="list-style-type: none"> Reporting and compliance of the AWS Well-Architected Framework Over 600 cloud misconfiguration rules out of the box CloudFormation template scanner Support to 20+ standards and frameworks Ticketing and communication system integration
Secure our Amazon S3 buckets	<u>Trend Micro Cloud One™ File Storage Security</u>	Amazon S3	<ul style="list-style-type: none"> Advanced antimalware Automated - no file size or number of file limits API for customized scans Cloud native architecture using AWS services
Protect our virtual network	<u>Trend Micro Cloud One™ Network Security</u>	Gateway Load Balancer Internet Gateway Network Firewall Transit Gateway Amazon VPC	<ul style="list-style-type: none"> Inspection at network speed Pure network layer intrusion prevention Flexible deployment options: public and private VPC, Edge, or VPC ingress routing or Transit Gateway No re-IPS No network redesign Vulnerability zero-day protection from ZDI
Build and run containers	<u>Trend Micro Cloud One™ Container Security</u>	Amazon ECR Amazon EKS	<ul style="list-style-type: none"> Container registry integration Advanced antimalware Vulnerability and secret/passcode scanning Policy enforcement for containers running on Kubernetes Runtime security
Build in security for the applications I write	<u>Trend Micro Cloud One™ Application Security</u>	Amazon EC2 AWS Fargate AWS Lambda	<ul style="list-style-type: none"> Provides application protection against: <ul style="list-style-type: none"> OWASP Top 10 Vulnerabilities URL redirects Malicious payloads Illegal file access Remote command executions SQL injections
Gain visibility into open-source libraries used by applications running on AWS services	<u>Open Source Security by Snyk</u>	Amazon EC2 AWS Fargate AWS Lambda Amazon ECS Amazon EKS	<ul style="list-style-type: none"> Open source vulnerabilities Continuous zero-day monitoring or open source dependencies Improved application development and security governance

Trend Micro Cloud One free trials and free tiers are always available on the [AWS Marketplace!](#)
