

Trend Micro Centralized On-Premise Security

Endpoint Security: Apex One – Single Converged Agent

Prevention	 Virtual Patching	 Device Control	 Firewall	 App. Control	 Exploit Prevention
Real Time Detection	 Machine Learning	 Behavioral Analysis	 Malicious CLI	 Network Fingerprinting	 Known Threats
Automated Response	 DLP	 Kill & Quarantine Processes	 Restore Encrypted Files	 Suspicious object/ Intelligence sharing	 Outbreak Prevention
Investigation and Response	 Cross layered detection	 IOC Sweeping	 MITRE Mapping	 Threat Intelligence	 Managed XDR

Server Security: Deep Security

Environments

Platforms

API & Integrations

Network Security

System Security

Malware Prevention

Runtime security for server workloads and data centers

Email Security: Deep Discovery Email Inspector

On-prem email gateway with advanced threat protection

Two modules that can be combined

Email Gateway

- Anti-spam
- Anti-phishing
- Email/Web Reputation
- Sender Filtering
- End-User Quarantine
- Content Filtering

Advanced Threats Protection

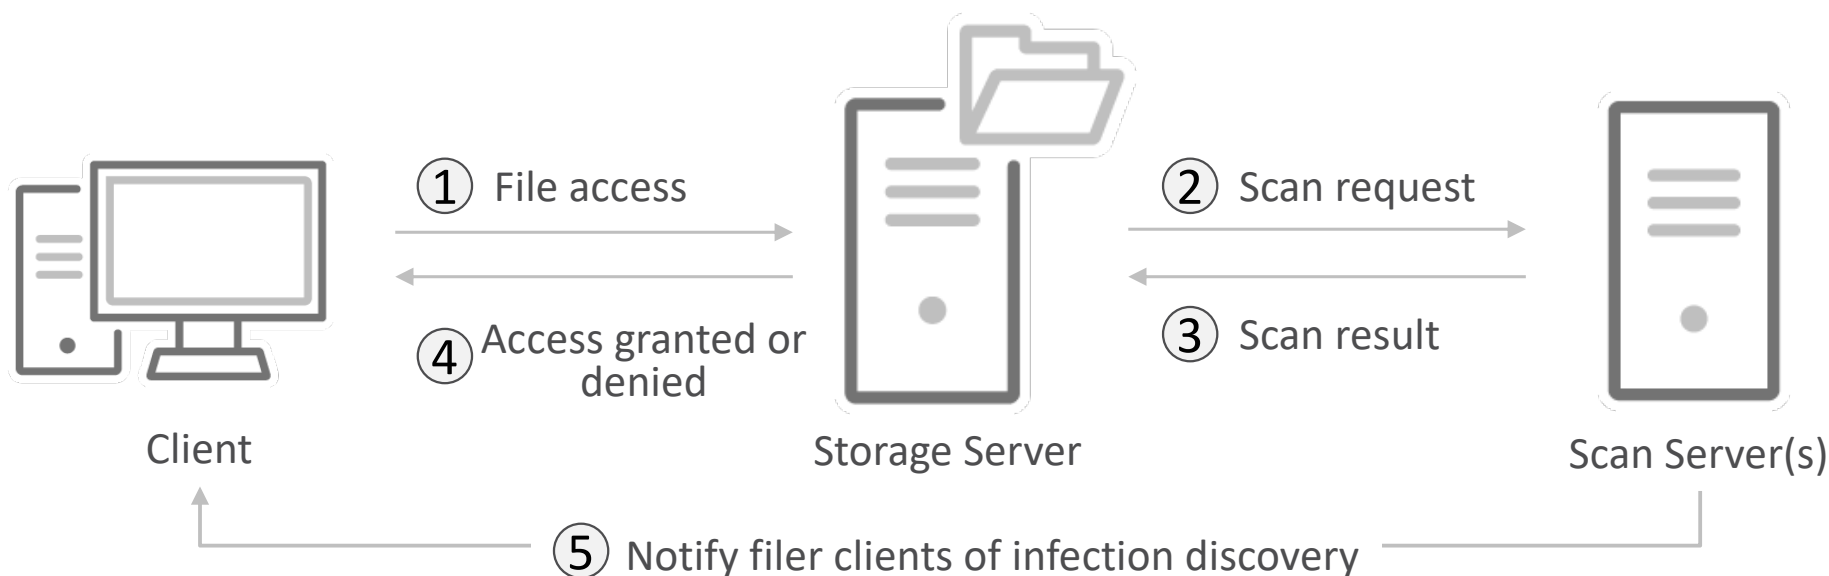

- Internal Sandbox
- Service Password Analyzer
- Predictive Machine Learning
- Yara Rules
- Time-of-Click Protection
- 3rd Party products integration
- Intelligence Sharing
- Malicious Macro Detection
- Trend Locality Sensitive Hash

Common Features

- External Sandbox (DDAN)
- Heuristics and Exploit Detection
- Web Reputation Service
- Business Email Compromise (BEC) protection
- Social Network Attack and Phishing protection
- Detection of Suspicious Objects

Storage Security: ServerProtect for Storage

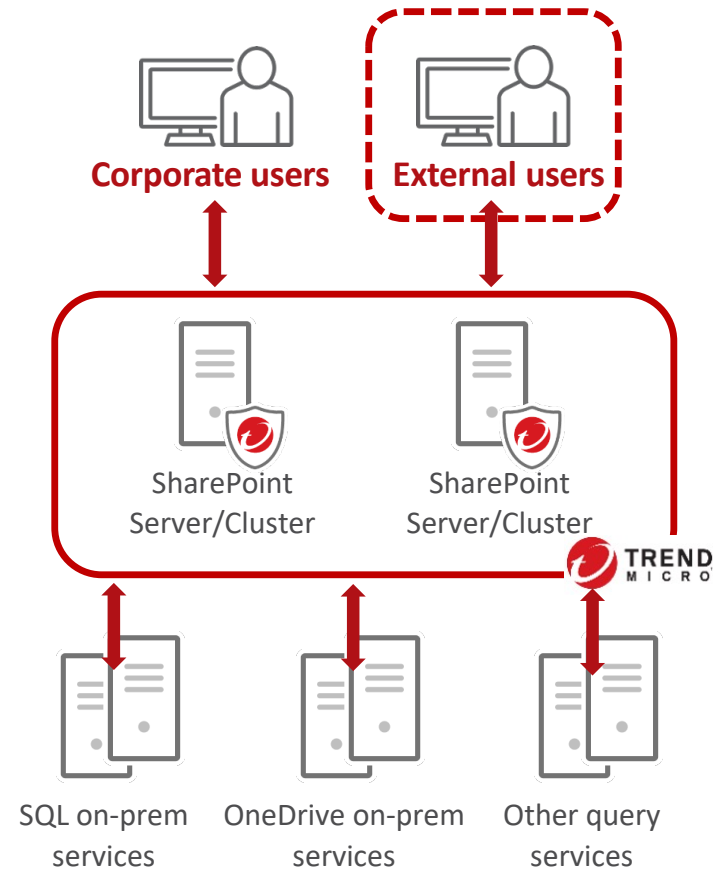

- Utilizes ICAP, CAVA or RPC depending on manufacturer
- Highly available and scalable scan servers
- Scan Servers can be physical or virtualized

Storage Security: PortalProtect for SharePoint

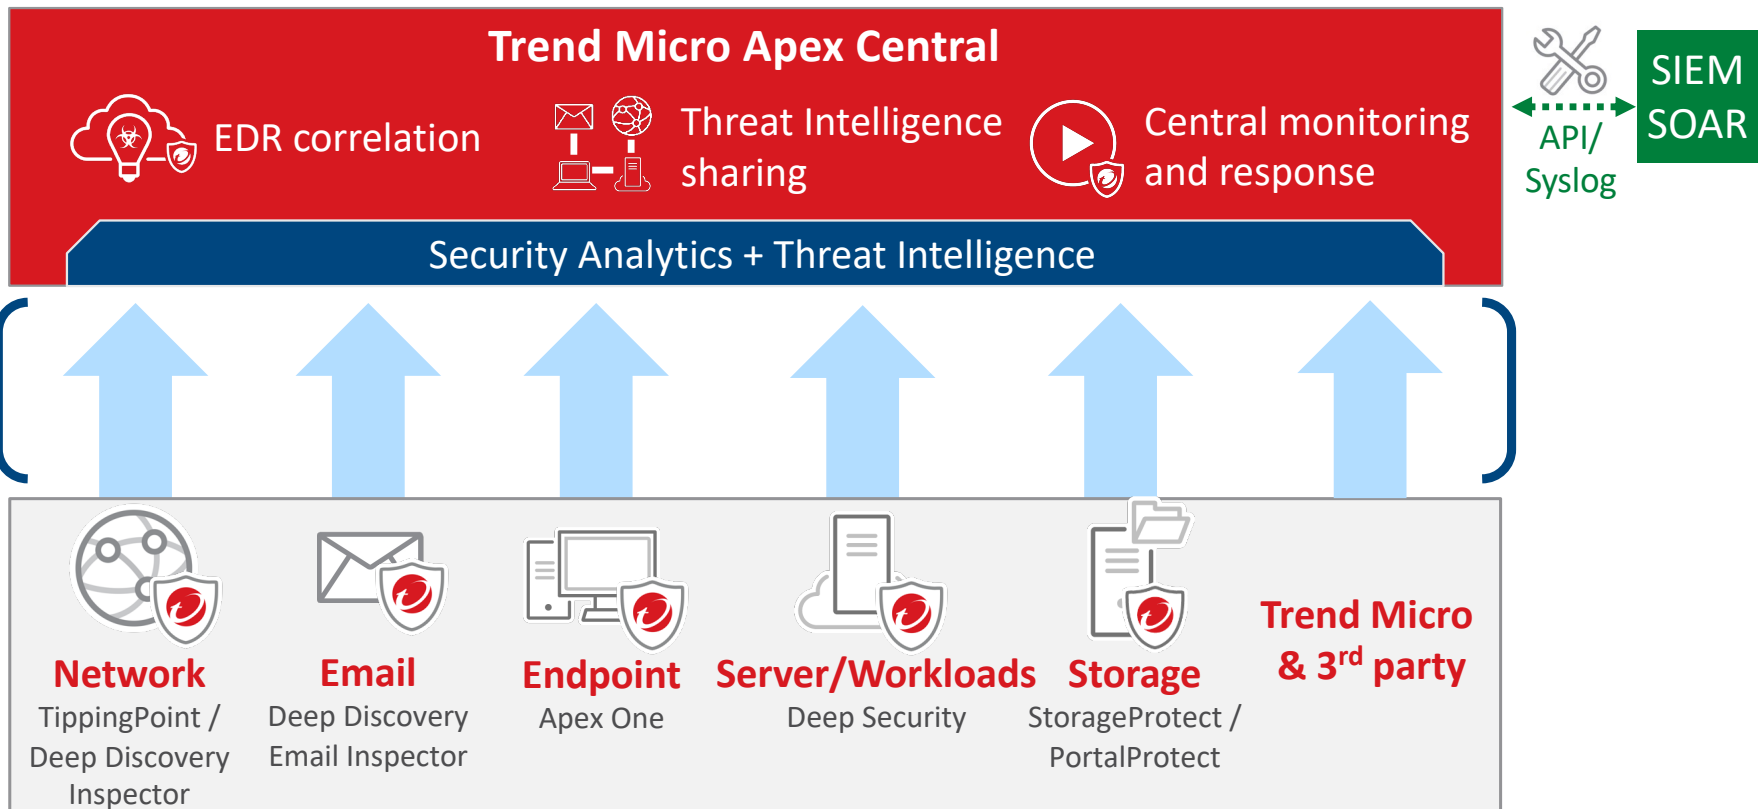

Security Features

- Anti-Malware
- True FileType Blocking
- Web Threat and URL protection
- Data Loss Prevention (DLP)
- Content Filtering
- Supports physical, virtual or private cloud deployments

Apex Central: Centralized On-Premise Security

prevention and activity data
(endpoint and network telemetry metadata, logs, NetFlow...)

Apex Central: Endpoint Detection & Response

Root Cause Analysis

IOC/Yara Sweeping
(File, IP, Registry, Memory)

API and Custom Intelligence
