

Symantec - Trend Micro | Product Comparison Chart

Below is a high level overview of various Symantec product offerings and the respective Trend Micro comparable solution.

Endpoint

Symantec Product	Trend Micro Product	Why Trend
<p>Symantec Endpoint Protection (SEP) Two options:</p> <ul style="list-style-type: none"> Complete: EPP + EDR + app control Enterprise: EPP <p>Note: Neither bundle includes DLP. SEP comes with Generic Exploit Migration built into the agent and standard license.</p>	<p>Smart Protection for Endpoint (EPP) Smart Protection Complete (EPP + email + web security) XDR for Users bundle (EPP + CAS + XDR)</p>	<ul style="list-style-type: none"> Trend Micro Smart Protection Suites includes DLP, which Symantec suites do not. Flexible deployment options - on-prem, SaaS and hybrid
<p>Symantec Endpoint Protection Cloud</p> <ul style="list-style-type: none"> SEP Managed in the cloud. The cloud and on-prem products were completely separate and transition was not easy (Aug 2019). The goal was to transition all customers to SEP Cloud. 	<p>Smart Protection for Endpoints (EPP) Smart Protection Complete (EPP + email + web security) XDR for Users bundle (EPP + CAS + XDR)</p>	<ul style="list-style-type: none"> Both Smart Protection Suites available as SaaS deployments On-prem version of endpoint protection will receive same EPP product functionality as SaaS (different release dates) Customers have total control and flexibility to move from on-prem to SaaS
<p>Symantec Device Control (Included in standard SEP license)</p> <ul style="list-style-type: none"> Can manage read/write/execute on any removable device, or writable CD/DVD devices. 	<p>Trend Micro Device Control (Included in Apex One endpoint protection)</p>	<ul style="list-style-type: none"> Easy to deploy and manage integrated device control, available as part of the Apex One single agent
<p>Symantec Application Control</p> <ul style="list-style-type: none"> Strong whitelist and blacklist capabilities 	<p>Apex One Application Control (part of Apex One single agent)</p>	<ul style="list-style-type: none"> Advanced whitelisting and black listing capabilities Easy to deploy and manage capabilities and application policies

Endpoint

Symantec Product	Trend Micro Product	Why Trend
<p>Symantec Content & Malware Analysis & Cloud Sandbox</p> <ul style="list-style-type: none"> Content Analysis is anti-malware (signature) for network based traffic through the Proxy. Malware Analysis is an on-prem malware sandbox. Cloud sandbox is malware sandboxing in the cloud. 	<p>Trend Deep Discovery Analyzer</p> <p>is an equivalent match to SYMC Malware Analysis. Trend Micro Cloud Sandboxing and Customizable Sandbox is equivalent to SYMC Cloud Sandbox.</p>	
<p>Symantec Data Loss Prevention Cloud and Symantec CloudSOC</p> <ul style="list-style-type: none"> Extends DLP for any cloud apps (O365, Box, Dropbox, Salesforce, Peoplesoft, etc.) Encryption for data shared on cloud apps using Information Centric Encryption <p>CASB capabilities for managing and auditing cloud accounts</p>	<p>Apex One integrated DLP (part Apex One Endpoint Protection)</p> <p>Cloud App Security (CAS)</p> <p>Trend Micro Endpoint Encryption</p>	<ul style="list-style-type: none"> Trend Micro DLP supports cloud applications such as Box and Dropbox, and data sent via email. Trend Micro provides CASB features such as DLP for cloud file sharing via our Cloud App Security solution. Trend offers endpoint encryption capabilities through our on-premises encryption solution.
<p>Symantec Endpoint Encryption</p> <ul style="list-style-type: none"> Includes endpoint and removable device encryption. 	<p>Trend Micro Endpoint Encryption</p>	<ul style="list-style-type: none"> On-premise, available as separate agent from Apex One Full disk, file, folder, removable media encryption Bitlocker and File Vault encryption key management
<p>Symantec Data Loss Protection</p> <ul style="list-style-type: none"> Industry leading standalone DLP (Endpoint, Network, Email, Cloud Storage, Cloud Apps) 	<p>Apex One integrated DLP (part of Apex One endpoint protection)</p>	<ul style="list-style-type: none"> Integrated DLP and device control capabilities available as part of the Apex One single agent Easy to use, templated DLP policies that can support most regulatory and regional requirements Symantec solution is expensive and not integrated with their endpoint security product, requiring a separate management console and agent.

Endpoint

Symantec Product	Trend Micro Product	Why Trend
<p>Symantec Endpoint Detection and Response (EDR)</p> <p>Two versions of EDR</p> <ul style="list-style-type: none"> • EDR is baked into the on-prem version of SEP - EDR Lite (at the time of Broadcom merger) • Cloud Managed EDR is a more advanced solution can be run in parallel with competitive antimalware (doesn't require SEP). • Provides deep forensic level analysis and flight data recorder 	<p>On prem: Trend Micro Endpoint Sensor</p> <p>SaaS: Trend Micro Endpoint Sensor, XDR Edition</p>	<ul style="list-style-type: none"> • Integrated with Apex One single agent • Endpoint Sensor SaaS allows for broader XDR capabilities - cross-layered detection and response which includes email, network, servers and cloud workload.
<p>Symantec Endpoint Protection (SEP) Mobile</p>	<p>Trend Micro Mobile Security</p>	
<p>Symantec Endpoint Protection for VDI</p>	<p>Virtual Desktop Infrastructure Add-on for Apex One</p>	<ul style="list-style-type: none"> • Available for Apex One On-premises
<p>Symantec Intrusion Prevention & Firewall</p> <ul style="list-style-type: none"> • Integrated with SEP. Also labeled as "Proactive Threat Protection" in the SEP console. 	<p>Trend Micro Apex One Vulnerability Protection (part of Apex One single agent)</p> <p>Intrusion protection is also available as part of our TippingPoint network solution offering.</p> <p>Firewall capabilities included in Smart Protection Suites and XDR for Users</p>	<ul style="list-style-type: none"> • Trend Micro has the industry's most timely vulnerability protection and is a top discloser of new vulnerabilities discovered every year.
<p>Symantec DeepSight Technical Intelligence</p> <p>Visibility into global threats and vulnerabilities (roughly 3000 products). Threat reports and deep malware analysis available.</p>	<p>Trend Micro Smart Protection Network</p>	

Email and Web Protection

Symantec Product	Trend Micro Product	Why Trend
<p>Symantec Mail Security for Microsoft Exchange</p> <ul style="list-style-type: none"> Antimalware solution deployed directly on the Exchange server. 	<p>ScanMail Suite for Exchange is the direct replacement.</p> <p>Trend Micro Cloud App Security (CAS) - equivalent product for Office 365/Gmail</p> <p>Trend Micro Email Security - gateway email security</p>	
<p>Symantec Virtual Secure Web Gateway</p> <ul style="list-style-type: none"> Virtual version of Proxy SG appliance Virtual Secure Web Gateway - available for VMWare, Microsoft Hyper-V, and AWS Secure Web Gateway Virtual Appliance (1st and 2nd Generation) 	<p>Trend Micro Web Security Advanced</p> <p>Trend Micro Web Security Standard</p> <p>InterScan Web Security Virtual Appliance (Trend does not have a Proxy solution)</p> <p>Cloud One Network Security does provide some similarities but it is a different use cases and provides protection/inspection at different network layers.</p>	
<p>Symantec Storage Protection</p> <ul style="list-style-type: none"> Protection for NAS, Sharepoint, File servers, AWS S3 buckets, etc. 		

Cloud and Server Protection

Symantec Product	Trend Micro Product	Why Trend
Symantec Cloud Workload Protection Suite <ul style="list-style-type: none"> Security and compliance for public and hybrid cloud workloads, storage, and containers 	Trend Micro Cloud One	Cloud One, a security services platform for cloud builders, delivers the broadest and deepest cloud security in one solution. With support for all major cloud platforms, and solutions Cloud One integrates directly into CI/CD processes, providing flexible application and data security without slowing down your DevOps teams.
Symantec Control Compliance Suite <ul style="list-style-type: none"> Modular solution to help identify security gaps and vulnerabilities and automate compliance assessments for over 100 regulations, mandates, and best practice frameworks. 	Trend Micro Cloud One Conformity	Cloud One Conformity is a continuous security, compliance and governance SaaS platform designed to help you manage misconfigurations of cloud resources (security posture) in a multi-cloud environment. Includes 520+ rules for AWS Well Architected Framework. Globally recognized Compliance Standard reporting against: PCI-DSS, CIS, SOC2, GDPR, HIPAA, and AWS Well-Architected Framework
Symantec Database Security <ul style="list-style-type: none"> Handled by Symantec Data Center Security 	Trend Micro Cloud One Deep Security	Data Center Security is a micro segmentation tool without an AV engine. It's not comparable to Deep Security, closer to SafeLock, see Additional Products. It's mostly used in OT, POS etc)
Symantec Cloud Workload Protection Suite Security and compliance for public and hybrid cloud workloads, storage, and containers	Trend Micro Cloud One	

Additional Products

Symantec Product	Trend Micro Product	Why Trend
<p>Symantec Internet of Things (IOT)</p> <ol style="list-style-type: none">1. Symantec Industrial Control System Protection (ICSP) – USB scanning station cleans and sanitizes storage devices.2. Symantec Data Center Security (formerly Critical System Protection (CSP))–Works without internet connectivity and supports legacy operating systems.	<ol style="list-style-type: none">1. Trend Micro Apex One Device Control - Trend doesn't offer a stand-alone USB scanning solution, but our device control capabilities as part of Apex One will detect malware on USB devices inserted into the endpoint.2. Trend Micro Safe Lock3. Trend Micro Portable Security <p>All products</p>	<ol style="list-style-type: none">1. Apex One Device Control is available as part of the single agent endpoint offering, and provides integrated device control with single console management and easy to deploy policies2. Safe Lock is a lockdown whitelisting solution ideally suited for air-gapped IoT and Industrial IoT environments.3. Portable Security is a portable USB scanning tool which can scan multiple endpoints for malware.
