Trend Micro

WORRY-FREE SERVICES

Cloud-based security services for Windows, Mac, and mobile devices

Worry-Free™ Services is a cloud-based security service that is a snap to install and easy to manage. It provides your business with industry-leading protection for your Windows, Mac, and mobile devices. It is powered by the **Trend Micro Smart Protection Network**™ - a worldwide early warning system that blocks threats before they can reach your business machines. Your devices will have constant access to the latest threat information.

Even security for remote workers or branch offices can be managed via the Internet with the Worry-Free Services' web-based console. So security policy or settings can be pushed to everyone on staff, no matter where they are located. Now, there's no need for remote workers to be under LAN or VPN to get the latest protection policy. It also updates automatically, so there's no need to spend time and resources on patching or updates.

NO SERVER REQUIRED FOR PROTECTION AGAINST VIRUSES, DANGEROUS WEBSITES, AND LOSING DATA

Worry-Free Business Security Services protects against viruses, dangerous websites, and other threats. As a hosted or cloud-based service, no server and no maintenance are required. It's protection that is easy to use and manage, even for a non-IT person. In short, your time and resources can be better spent on your strategic business projects and priorities instead of worrying about your IT security.

TREND MICRO™ REMOTE MANAGER FOR YOUR IT SERVICE PARTNER

If you'd rather have your trusted IT services partner monitor your security status and alerts, **Trend Micro Remote Manager** provides an intuitive management console that allows your IT partner to remotely manage Worry-Free Services for you.

Remote Manager can now also be integrated with industry-leading RMM/PSA tools like ConnectWise, Kaseya IT automation framework, and Autotask, to simplify support and customer management for MSPs that leverage these solutions.

#1 GLOBAL CONTENT SECURITY SMALL BUSINESS 2011 - 2014

Trend Micro is the worldwide number one content security vendor for small businesses for the past 4 years in a row.

– Canalys, Worldwide IT Security Market 2015

AV-TEST av-test.org 01/2015 CERTIFIED

In January 2015, AV-Test benchmarked mobile security solutions, and Trend Micro Mobile Security for Android excelled and achieved certification. It ranked higher in safeguarding from Android malware and Potentially Unwanted Apps (PUA) than the average of all vendors tested.

PC PRO RECOMMENDED 2015

Trend Micro delivers first-class malware protection and its well-designed cloud portal makes light work of administration.
